# roxio secure BURN™

Roxio Secure Burn™ reliably burns data on CD, DVD and Blu-ray Discs™ as easily as dragging and dropping files and folders. Powerful data encryption and password protection ensure that the disc contents can only be accessed by authorized users.

Roxio Secure Burn™ protects your organization against breach of data stored on CD, DVD and Blu-ray Discs, and facilitates employee compliance with security policies .

Archiving and moving data on CDs, DVDs and Blu-ray Discs is a common practice in today's computing environment. However, discs can be easily stolen, and loss of unsecured data can result in severe penalties, time-consuming lawsuits, harm to an organization's reputation and other costs. Roxio combines easy data burning with powerful encryption, greatly reducing the risk of data breaches while ensuring compliance with policies and regulations. Roxio's products are scalable to meet the varied needs of today's computing enterprise, large and small.

Benefits

- Meets all common user needs for data burning, including essential capabilities not found in Windows® – disc copying, multi-disc data spanning, data encryption and more

- Supports FIPS 140-2* certified encryption and password protection of data stored on disc, ensuring compliance with mandated security standards

- Prevents unauthorized access to data in case a disc is lost or stolen

- Designed for streamlined evaluation and approval within organizations
Clicking the Burn button launches the encryption dialog
Retrieval of data from the disc requires the password
Minimum System Requirements

- Microsoft® Windows XP, Windows Vista or Windows 7 (32-bit and 64-bit versions supported) to write discs and to read encrypted discs (latest service packs recommended)
- Hard drive with at least 100 MB of free space for installation
- 256 MB or more RAM
- Internet Explorer 6.0 or greater for reading Help files
- CD, DVD or Blu-ray writer

* FIPS 140-2 is a U.S. government security standard used to accredit cryptographic modules used in computers and software. Roxio secure burning uses a FIPS 140-2 certified encryption module from Microsoft.

ROXIO SECURE SOLUTIONS

Roxio's solutions are scalable to meet the needs of any organization.

Roxio Secure Burn™ reliably burns data on CD, DVD and Blu-ray Discs™ as easily as dragging and dropping files and folders. Powerful data encryption and password protection ensure that the disc contents can only be accessed by authorized users.

Roxio Secure Burn Plus™ combines drag and drop secure data burning and encryption with group read/write permissions to ensure that only members with authorized PCs can access data on CD, DVD or Blu-ray Discs.

Roxio Secure Managed™ combines encrypted data burning with a web service that gives organizations real time control over employee access to CDs, DVDs, Blu-ray Discs and USB flash drives, ensuring that sensitive data stays within the enterprise.

THE LICENSING SOURCE FOR ROXIO PRODUCTS
