

roxio secure BURN™

Roxio Secure Burn™ reliably burns data on CD, DVD and Blu-ray Discs™ as easily as dragging and dropping files and folders. Powerful data encryption and password protection ensure that the disc contents can only be accessed by authorised users.

Roxio Secure Burn™ protects your organisation against breach of data stored on CD, DVD and Blu-ray discs, and facilitates employee compliance with security policies.

Archiving and moving data on CDs, DVDs and Blu-ray discs is a common practice in today's computing environment. However, discs can be easily stolen, and loss of unsecured data can result in severe penalties, time-consuming lawsuits, harm to an organisation's reputation and other costs. Roxio combines easy data burning with powerful encryption, greatly reducing the risk of data breaches while ensuring compliance with policies and regulations. Roxio's products are scalable to meet the varied needs of today's computing enterprise, large and small.

Benefits

- Meets all common user needs for data burning, including essential capabilities not found in Windows® – disc copying, multi-disc data spanning, data encryption and more
- Supports FIPS 140-2* certified encryption and password protection of data stored on disc, ensuring compliance with mandated security standards
- Prevents unauthorised access to data in case a disc is lost or stolen
- Designed for streamlined evaluation and approval within organisations

Clicking the Burn button launches the encryption dialog

Retrieval of data from the disc requires the password

Minimum System Requirements

- Microsoft® Windows XP, Windows Vista or Windows 7 (32-bit and 64-bit versions supported) to write discs and to read encrypted discs (latest service packs recommended)
- Hard drive with at least 100 MB of free space for installation
- 256 MB or more RAM
- Internet Explorer 6.0 or newer for reading Help files
- CD, DVD or Blu-ray writer

* FIPS 140-2 is a U.S. government security standard used to accredit cryptographic modules used in computers and software. Roxio secure burning uses a FIPS 140-2 certified encryption module from Microsoft.

ROXIO SECURE SOLUTIONS

Roxio's solutions are scalable to meet the needs of any organisation.

Roxio Secure Burn™ reliably burns data on CD, DVD and Blu-ray Discs™ as easily as dragging and dropping files and folders. Powerful data encryption and password protection ensure that the disc contents can only be accessed by authorised users.

Roxio Secure Burn Plus™ combines drag and drop secure data burning and encryption with group read/write permissions to ensure that only members with authorised PCs can access data on CD, DVD or Blu-ray discs.

Roxio Secure Managed™ combines encrypted data burning with a web service that gives organisations real time control over employee access to CDs, DVDs, Blu-ray discs and USB flash drives, ensuring that sensitive data stays within the enterprise.

ROXIO COMPARISON CHART	Roxio Secure Burn	Roxio Secure Burn Plus	Roxio Secure Managed
Burns data to CD, DVD, Blu-ray disc	✓	✓	✓
Encryption and monitoring of data on USB flash drives			✓
Intuitive, discoverable desktop drag & drop UI	✓	✓	✓
Reads and writes disc image files	✓	✓	✓
Small footprint, minimal hard disk space required	✓	✓	✓
Designed for streamlined evaluation and approval	✓	✓	✓
Disc spanning of files and folders too big to fit on one disc	✓	✓	✓
FIPS 140-2 certified encryption*	✓	✓	✓
Dynamic language support (MUI)	✓	✓	✓
Set group read/write permissions at install		✓	✓**
Change group read/write permissions after install		✓	✓
Advanced verification to ensure file integrity on disc	✓	✓	✓
Obscure filenames on encrypted discs for enhanced security	✓	✓	✓
BD-XL support	✓	✓	✓
Real time dynamic control over read/write permissions via web control panel			✓
Read and write permissions can be controlled per user			✓
Logging and reporting of files burned to disc			✓

* FIPS 140-2 is a U.S. government security standard used to accredit cryptographic modules used in computers and software. Roxio secure burning uses a FIPS 140-2 certified encryption module from Microsoft.

** Via web control panel
